## Professional Experience

---

### The Esport Company

Full Stack Developer

Johnstown, PA

June 2021 - Present

- Created flat style designs and layouts for 50+ pages with a mobile-first approach, helping reduce UI-related support tickets by 85%.
- Led development of a new web platform with Next.js and React, resulting in an 80x increase in users and a 30% boost in user retention and engagement..
- Created a websocket server with Node for real time messaging between users, helping reduce the match forfeit rate by 70%.
- Modernized backend by replacing a PHP API with React Server Components and NextJS API routes, resulting in faster load times through server-side rendering.
- Designed and implemented a MySQL database and integrated Prisma ORM to improve maintainability and reduce query errors.
- Regularly communicate with end users for platform support and gathering feedback, helping increase bi-yearly customer ratings by 40%.
- Led a team of 3 engineers in an agile environment with weekly sprint planning, peer code reviews, and semiweekly meetings.

### DirecTec LLC

Systems Engineer

Hollsopple, PA

Jan 2024 - Oct 2024

- Performed an organization-wide migration from Google Workspace to Microsoft 365, resulting in an increase in productivity and collaboration.
- Developed and launched an inventory software to track thousands of item locations, reducing lost inventory accidents by over 50% and significantly reducing the search time for parts.
- Developed a real-time display for an office TV that pulls data from Zoho APIs to display high priority upcoming jobs, improving their visibility and allowing staff to easily identify them.
- Automated excel reports from Zoho APIs, saving management 8 hours per week and ensuring reports are always accurate.
